DETAILED ACTION

Response to Amendment

This Office Action has been issued in response to amendment filed 17 November 2006.

Claim Status

Claims 1-7 and 11-22 remain pending and are ready for examination.

Election/Restrictions

In response to claim amendments filed 17 November 2006, restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 11-14, drawn to replacing contents within a stack with other data, classified in class 711, subclass 133.
- II. Claims 15-22, drawn to storing stack data, classified in class 711, subclass 132.

Inventions I and II are related as subcombinations usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case invention,

- o I - Replacing data in a nonvolatile memory stack, has separate utility such as invalidating data previously written to the stack. This ability to invalidate data is not present within invention II.
- o II - Storing data in a nonvolatile memory stack, has separate utility as in replacement strategies are not considered.

See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I (including a replacement strategy) is not required for Group II, a restriction for examination purposes as indicated is proper.
